We believe this evidence document to be sufficient at this stage of the plan process. As stated in our precious response, we would recommend that the plan is updated throughout the lifetime of the Local Plan Period to ensure assumptions around delivery of wastewater infrastructure are still valid.

We note the plan places heavy reliance on Anglian Water Services' (AWS') next Drainage and Wastewater Management Plan (DWMP) (2030-2055) to deliver the required infrastructure upgrades needed to meet the planned growth. The DWMP should enable delivery of infrastructure at key moments, but you may need to provide AWS more detailed phasing information over the plan lifetime so they can apply for relevant funding to accommodate upgrades in good time.

Concerning Uttons Drove, which is listed as a Critical Priority in Table 8-1 (Summary of Strategic Wastewater Projects): The Greater Cambridge Integrated Water Management Study – Detailed Water Cycle Study (October 2025) sets out that Uttons Drove is already exceeding its permitted Dry Weather Flow. Section 2.6 of the Water Cycle Study Addendum (2026) provides further information as to the challenges of increasing treatment capacity at this location to regain compliance and accommodate the planned growth. Whilst we expect that the DWMP will include an assessment of those challenges and provide information on what can be done, this may lead to some delay in initial upgrades being completed, or alternatives being in place (i.e. after 2030). Phasing of development to align with capacity availability (and thus Policy CC/IW) will therefore be very important in this wastewater catchment area.

Please provide a 100 word summary of your representation.
