Section 3: Your representation

Please set out and explain your comments. Please be as precise as possible, and please do not just refer to an attached supporting document(s). For your representation (comments) to be considered, your representation must be set out here. Wherever possible, set out precisely any changes you think should be made to the plan and its policies.

We note that Policy I/EI: Energy infrastructure masterplanning, mentions the possibility of battery storage facilities. Where Battery Energy Storage Systems (BESS) are developed there is potential for pollution of the water environment in the case of emergency situations, in particular fires. In the event of a fire, highly polluting chemicals in batteries could present risks to groundwater and surface water in firewater or rainfall via surface water run-off. We recommend that the policy requires that applicants should ensure mitigation is in place for containment of this water and propose appropriate mitigation measures. Applicants should assess risks to groundwater and consider whether BESS battery containers should be located away from vulnerable receptors.

Please provide a 100 word summary of your representation.
